The Role of Small Scale Industries in Empowering Women- Uma Rangaiah 2012-08-01 Small scale industries play a key role in the industrialization of developing countries. This is because they provide immediate large-scale employment and has a comparatively higher labour capital ratio: they need a shorter gestation period and relatively smaller markets. They need lower investments, offer a method of ensuring a more and equitable distribution of national income and facilitates an effective mobilization of resources of capital and skill. The small scale sector in India has played a very important role in the socio-economic development of the country during the past 50 years. In has significantly contributed to the overall growth in terms of the GDP, employment generation and exports. The performance of the small scale sector therefore has a direct impact on the growth of the overall economy. This study is restricted to the role of small scale sector in Indian economy. India is a poor country mainly depending on agriculture. The role of small scale sector in its economic development is highlighted. This study deals with the role of SSI in empowering weaker sections. SSI has been considered as one area where women workers are in good number.

Food Security in Africa- Barakat Mahmoud 2021-01-20 This edited volume “Food Security in Africa” is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of food safety and availability, water issues, farming and nutrition. The book comprises single chapters authored by various researchers and edited by an expert active in the public health and food security research area. All chapters are complete in itself but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors on Africa’s food security challenges, quality of water, small-scale farming as well as economic and social challenges that this continent is facing. Hopefully, this volume will open new possible research paths for further novel developments.

Small-scale Industry in Korea- Hongtack Chun 1985

Sustainability Challenges in the Agrofood Sector- Rajeev Bhat 2017-04-24 Sustainability Challenges in the Agrofood Sector covers a wide range of agrofood-related concerns, including urban and rural agriculture and livelihoods, water-energy management, food and environmental policies, diet and human health. Significant and relevant research topics including the most recent updates will be covered, with contributions from leading experts currently based in academia, government bodies and NGOs (see list of contributors below). Chapters will address the realities of sustainable agrofood, the issues and challenges at stake, and will propose and discuss novel approaches to these issues. This book will be the most up-to-date and complete work yet published on the topic, with new and hot topics covered as well as the core aspects and challenges of agrofood sustainability.

The Role of Small Scale and Rural Industry and Its Interaction with Agriculture and Large Scale Industry in China- Jon Sigurdson 1974

Report of the Expert Consultation on the Role of Small-scale Fisheries in Poverty Alleviation and Food Security- Food and Agriculture Organization of the United Nations 2004 The Expert Consultation was convened in order to elaborate guidelines on the policies and actions needed to increase the contribution of small-scale fisheries to poverty alleviation and food security. The Consultation noted that there is little reference to poverty alleviation and insufficient coverage of small-scale fisheries in the Code of Conduct for Responsible Fisheries, and recommended the development of a new article on “Small-scale Fisheries and Poverty Alleviation.”

Profitable Small Scale Industries-Money making Business Ideas for Startup (when you don't know what industry to start)-2nd Revised Edition-NPCS Board of Consultants & Engineers 2019-01-01 Micro, Small & Medium Enterprises (MSME) have been playing an important role in the overall economic development of a country like India, where millions of people are unemployed or underemployed. The economic development of any country largely depends upon the establishment of industries. MSME sector comprises 95 per cent of the total industrial units in the country. The hunt for funding has been the bane of an entrepreneur’s existence from times of yore. Many abandon their dream to build, create, and innovate in the face of this difficult struggle without realising that a good business idea will eventually pool in the bounty-full once it has secured a place in the market. Your idea will bring you your company, your company will bring you the people, and the people will bring you the market. A good idea has no monetary value, just a whole lot of bursting potential. Today, the World’s most successful entrepreneurs like Dhirubhai Ambani and Karsanbhai Patel - Man behind NIRMA may hold the possibility of building pyramids out of notes, but none of them started at the top of the ladder. Facebook was created out of a Harvard dorm room at minimal cost and Microsoft was formed two years after Gates decided to drop out of college. For an entrepreneur starting out, it makes good business sense to avoid ideas that require high capital investment in equipment, land, etc. Venturing into the manufacturing business requires to divide time and effort between producing, creating and selling. It is best to venture into product areas that requires small to medium investment, which can be returned within few years. If one want to start off on his own, this book provides some manufacturing business ideas with small and medium investment. The major contents of the book are India Government Loan Schemes for Small Scale Businesses, Government Support for Innovation and Entrepreneurship in India, Pradhan Mantri Mudra Yojana, Packaging and Labeling, Product Packaging, Marketing, Onion Dehydration, Garlic Dehydration, Onion Pickle, Onion Chutney, Garlic Oil, Onion Powder, Ginger Oil, Ginger Powder, Ginger Paste, Tomato Pulp, Tomato Paste, Tomato Ketchup, Tomato Powder, Disposable Blood Bags, Disposable Masks, Disposable Surgical Catheters, Disposable Plastic Syringes, Plastic Cups, Disposable Banana Leaf Plate, Facial Tissue & Baby Wet Wipes, Urea Formaldehyde Resin Adhesive, Toothpaste Production, Gypsum Board, Surgical Absorbent Cotton, Glass Fibre, Complex Fertilizers, Activated Carbon from Wood, Biscuits, Candy, Chocolates, Milk Powder, Instant Noodles, Khakhra, Soft Drinks, Spices and Sample Plant Layouts. If you ever had an idea that you want to turn into a profitable business endeavor; this book will be a mile stone for you. Remember Dhirubhai Ambani said, “Ideas are no one’s monopoly Think big, think fast, think ahead.” TAGS Profitable Small Scale Industries, Money Making Business Ideas, Small Scale Manufacturing Business Ideas, Good Small Business Ideas with Low Investment, Business Ideas for Small Scale Industry, Small Scale Industries Projects, Small Scale Manufacturing Business Ideas, New Manufacturing Business Ideas with Medium Investment, Most Profitable Manufacturing Business to Start, What is the Most Profitable Small Scale Business in India? The Role of Small-scale Enterprises in the Development Process- Meine Pieter van Dijk 1982

Japan's Small Scale Family Enterprises-Hugh T. Patrick 1986

Small and Medium Enterprises in Asian Pacific Countries: Roles and issues-Moha Asri Hj. Abdullah 2000 These books provide an overall account of small and medium enterprises in selected Asia-Pacific countries such as Singapore, Malaysia, South Korea, Thailand, Philippines, China, Indonesia, Japan, Australia, New Zealand, United Kingdom and Canada. All of these countries have given high policy agenda on the development of small and medium enterprises since SMEs contribute significantly to the respective national economic development. The books therefore provides various experiences on SMEs, issues and challenges, incentive and policies adopted by various governments and, more significantly, prospects for growth and development potential of SMEs in the
Small and Medium-Sized Enterprises in the Global Economy—Zoltan J. Acs 2010-08-10 Entrepreneurship and globalization are two much-examined forces as we enter the new millennium—yet very little has been published on the intersection of small and medium-sized enterprises (SMEs) and the global economy. To close the gap, this volume delves into the intricate roles and consequences of such businesses on both global and domestic economies. The first part of the volume provides an overview of the phenomenon of globalization, arguing that entrepreneurial discovery and technological change lead to globalization, which in turn leads to further opportunity for entrepreneurial discovery—no less for SMEs than for multinational corporations. In part two, the essays examine the role of SMEs in the global economy and why they are thriving. Part three reviews the roles of SMEs and innovators and examines their roles in direct foreign investment. Part four explores the role of technological diversity and knowledge spillovers as a way to explain the superior innovative performance of SMEs. Part five looks at the role of SMEs in technology transfer. Finally, part six examines the theoretical and policy implications of the international activities of SMEs, suggesting that policies should aim to reduce the costs in international expansion for SMEs. This volume will provide the foundation for further study in SMEs and globalization. It will appeal to scholars and students in both international business and economics. Zoltan J. Acs is Professor of Economics and Finance, University of Baltimore. Bernard Yin Yeung is Professor of International Business, University of Michigan.

A Market-oriented Strategy for Small and Medium Scale Enterprises—Kristin Hallberg 2000-01-01 This paper investigates the economic rationale for intervention in support of small and medium scale enterprises, on both theoretical and empirical grounds. It argues that the justification for SME interventions lies in market and institutional failures that bias the size distribution of firms, rather than on any inherent economic benefits provided by small firms. The role of the state is mainly to provide an enabling business environment that opens access to markets and reduces policy-induced biases against small firms. Governments can accelerate the development of markets for financial and non-financial services suited to SMEs by promoting innovation in products and delivery mechanisms, and by building institutional capacity. Improving the development impact of SME strategies will require much more attention to the monitoring and evaluation of intervention outcomes.

Role of Small-scale Enterprises in the Palestinian Economy—Ali Muhanna 2001

The Role of Small Industrial Enterprises in Zimbabwe's Industrialisation Future—M. C. Halimana 1993

Social Wellbeing and the Values of Small-scale Fisheries—Derek S. Johnson 2017-08-10 This book advances discussions of values in fisheries by showing the rich theoretical insights and connections possible when value is grounded in a multi-dimensional social well being approach. Questions of value have long been a central, if often unacknowledged, concern in maritime studies and in research on fisheries. Social scientists have looked at changing perceptions of value as coastal regions and fisheries have industrialized, economic interconnections have deepened, ecosystems have been depleted, shifts in population have occurred, and governance arrangements have been transformed. With a focus on the diverse ways in which small-scale fisheries are valued, the contributions to this volume address these and other themes through cases from numerous countries in Asia, Europe, and Latin America. “This volume provides a timely contribution to the development of new approaches that seek to capture the complexity of how fisheries can be understood beyond standard mono-dimensional, and often economic, interpretations. Each chapter makes a clear and stand-alone contribution to conceptual and methodological advancement, and collectively these works cover a wide range of frameworks and schools of thought.” Dr Sarah Coulthard, Senior Lecturer in International Development, Northumbria University, UK “The list of contributing authors [is] impressive and covers a wide geographical range of illustrative examples, [which] helps to demonstrate the global value of small-scale fisheries.” Professor J. Allister McGregor, Professor in Political Economy, the University of Sheffield, UK
