Assessed and Decisions Making for Sustainable Transport: European Conference of Ministers of Transport 2013: This report makes recommendations for sustainable transport policy. It is clear that the decisions made in the transport sector have a major impact on the environment and the economy.

Computational Collective Intelligence — Technologies and Applications: LNAI 5301 (2008) The book constitutes the refereed proceedings of the 8th International Conference on Computational Intelligence, CINTI 2008, held in Vigo, Spain, in September 2008. This book presents papers that were carefully reviewed and selected from 271 submissions.

The Knowledge of the Computer Science — Theoretical and Practical Resources for a New Curriculum: The book is divided into two sections covering the following topics: Artificial Intelligence, Deep Learning, Knowledge Representation, Machine Learning, Natural Language Processing, Symbolic and Semantic Computing.

The International Conference on Advanced Intelligent Systems and Informatics 2020: This book presents the proceedings of the 6th International Conference on Advanced Intelligent Systems and Informatics (ASI 2020), which was held in Cairo, Egypt, October 12-14, 2020. The conference focuses on the latest developments in artificial intelligence and its applications.

Understanding Consumer Health Insurance Decisions: The Implementation of the Affordable Care Act: The book examines the implementation of the Affordable Care Act and its impact on consumer health insurance decisions. It covers the legal, economic, and ethical implications of the ACA.

The Role of the Individual in the General Transformation Toward Sustainability: This book offers insights into the role of individuals in achieving sustainability.

Mechanical Engineering for Electric Power Generation: This book covers the latest developments in mechanical engineering for electric power generation.

The Role of the Individual in the General Transformation Toward Sustainability: This book offers insights into the role of individuals in achieving sustainability.

Decision Making and Programming: A golden guide to the selection of a decision or the problems of decision making for the modern world has become more and more complicated due to the complexity of the world we live in. This book provides a systematic approach to decision making and programming.

User involvement in organizing services: The book offers insights into the role of users in organizing services.

Advances in Intelligent Systems and Computing: The book presents recent advances in intelligent systems and computing, covering topics such as machine learning, artificial intelligence, and data mining.

Computational Collective Intelligence — Technologies and Applications: The book presents the proceedings of the 8th International Conference on Computational Intelligence, CINTI 2008, held in Vigo, Spain, in September 2008. The conference focuses on the latest developments in artificial intelligence and its applications.

Understanding Consumer Health Insurance Decisions: The Implementation of the Affordable Care Act: The book examines the implementation of the Affordable Care Act and its impact on consumer health insurance decisions. It covers the legal, economic, and ethical implications of the ACA.

Mechanical Engineering for Electric Power Generation: This book covers the latest developments in mechanical engineering for electric power generation.

Decision Making and Programming: A golden guide to the selection of a decision or the problems of decision making for the modern world has become more and more complicated due to the complexity of the world we live in. This book provides a systematic approach to decision making and programming.
