Autonomous Vehicle Technology-James M. Anderson 2014-01-10 The automotive industry appears close to substantial change engendered by “self-driving” technologies. This technology

offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this

technology raises.

To Defeat the Few-Douglas C. Dildy 2020-07-09 Over the past 80 years, histories of the Battle of Britain have consistently portrayed the feats of 'The Few' (as they were immortalized in Churchill's famous speech) as being responsible for the RAF's victory in the epic battle. However, this is only part of the story. The results of an air campaign cannot be measured in terms of territory captured, cities occupied or armies defeated, routed or annihilated. Successful air campaigns are those that achieve their intended aims or stated objectives. Victory in the Battle of Britain was determined by whether the Luftwaffe achieved its objectives. The Luftwaffe, of course, did not, and this detailed and rigorous study

explains why. Analysing the battle in its entirety in the context of what it was - history's first independent offensive counter-air campaign against the world's first integrated air defence system - Douglas C. Dildy and Paul F. Crickmore set out to re-examine this remarkable conflict. Presenting the events of the Battle of Britain in the context of the Luftwaffe's campaign and RAF Fighter Command's battles against it, this title is a new and innovative history of the battle that kept alive the Allies' chances of defeating Nazi Germany.

Transnational Organized Crime-Heinrich-Böll-Stiftung 2014-03-31 Transnational organized crime interferes with the everyday lives of more and more people - and represents a serious threat to democracy. By now, organized crime has become an inherent feature of economic globalization, and the fine line between the legal and illegal operation of business networks is blurred. Additionally, few experts could claim to have comprehensive knowledge and

understanding of the laws and regulations governing the international flow of trade, and hence of the borderline towards criminal transactions. This book offers contributions from 12 countries around the world authored by 25 experts from a wide range of academic disciplines, representatives from civil society organizations and private industry, journalists, as well as activists. Recognizing the complexity of the issue, this publication provides a cross cultural and multi-disciplinary analysis of transnational organized crime including a historical approach from different regional and cultural contexts.

The Guerrilla and how to Fight Him- 1962

Saving Oil in a Hurry-Agence internationale de l'énergie 2005 During 2004, oil prices reached levels unprecedented in recent years. Although world oil markets remain adequately supplied, high oil prices reflect increasingly uncertain conditions, and many countries are considering ways to improve capacity to handle market volatility and possible supply disruptions in the future. In light of these concerns, this publication sets out a new quantitative assessment of the potential oil savings and costs of rapid oil demand restraint measures for transport, useful

for both large-scale disruptions, and for smaller, localised supply disruptions in individual countries. It examines potential approaches for rapid uptake of measures such as telecommuting, ecodriving, and car-pooling; as well as discussing methodologies for adapting policy measures to national circumstances.

Eyes of Artillery-Edgar F. Raines 2000

System Dynamics Modelling-R.G. Coyle
1996-05-01 With NATO's bombing campaign against Serbia now over, what strategic, long-range plans will the alliance employ to restore stability to the region? As the global economy continually changes in response to worldwide events, what investment strategies will firms implement to cope with changing markets? And how can major pharmaceutical companies solve the problem of having newly-developed products abandoned before they can even be launched on the market? This book is designed and written to

give the applied statistician an insight into all these areas of investigation.

Reinventing the Automobile-William J.

Mitchell 2010-01-29 How to leave behind our unwieldy, gas-guzzling, carbon dioxide-emitting vehicles for cars that are green, smart, connected, and fun. This book provides a long-overdue vision for a new automobile era. The cars we drive today follow the same underlying design principles as the Model Ts of a hundred years ago and the tail-finned sedans of fifty years ago. In the twenty-first century, cars are still made for twentieth-century purposes. They are inefficient for providing personal mobility within cities—where most of the world's people now live. In this pathbreaking book, William Mitchell and two industry experts reimagine the automobile, describing vehicles of the near future that are green, smart, connected, and fun to drive. They roll out four big ideas that will make this both feasible and timely. The fundamental reinvention of the automobile won't

be easy, but it is an urgent necessity—to make urban mobility more convenient and sustainable, to make cities more livable, and to help bring the automobile industry out of crisis.

Half the battle-Robert Mackay 2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. How well did civilian morale stand up to the pressures of total war and what factors were important to it? This book rejects contentions that civilian morale fell a long way short of the favourable picture presented at the time and in hundreds of books and films ever since. While acknowledging that some negative attitudes and behaviour existed—panic and defeatism, ration-cheating and black-marketeering—it argues that these involved a very small minority of the population. In fact, most people behaved well,

and this should be the real measure of civilian morale, rather than the failing of the few who behaved badly. The book shows that although before the war, the official prognosis was pessimistic, measures to bolster morale were taken nevertheless, in particular with regard to protection against air raids. An examination of indicative factors concludes that moral fluctuated but was in the main good, right to the end of the war. In examining this phenomenon, due credit is accorded to government policies for the maintenance of morale, but special emphasis is given to the 'invisible chain' of patriotic feeling that held the nation together during its time of trial.

Humanizing Digital Reality-Klaas De Rycke 2017-09-15 This book aims at finding some answers to the questions: What is the influence of humans in controlling CAD and how much is human in control of its surroundings? How far does our reach as humans really go? Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality? How much data do we have and can we control? Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms? Are processing power, robots for the digital environment and construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture? The chapter authors were invited speakers at the 6th Symposium "Design

Modelling Symposium: Humanizing Digital Reality", which took place in Ensa-Versailles, France from 16 - 20 September 2017.

The Battle of Britain in the Modern Age, 1965-2020-Garry Campion 2019-09-26 The Battle of Britain has held an enchanted place in British popular history and memory throughout the modern era. Its transition from history to heritage since 1965 confirms that the 1940 narrative shaped by the State has been sustained by historians, the media, popular culture, and through non-governmental heritage sites, often with financing from the National Lottery Heritage Lottery Fund. Garry Campion evaluates the Battle's revered place in British society and its influence on national identity, considering its historiography and revisionism; the postwar lives of the Few, their leaders and memorialization; its depictions on screen and in commercial products; the RAF Museum's Battle of Britain Hall; third-sector heritage attractions; and finally, fighter airfields, including RAF Hawkinge

as a case study. A follow-up to Campion's *The Battle of Britain, 1945-1965* (Palgrave, 2015), this book offers an engaging, accessible study of the Battle's afterlives in scholarship, memorialization, and popular culture.

Automotive Detailing in Detail-Dom Colbeck 2017-02-06 Automotive Detailing in Detail takes the combined experience and expertise of three leading detailing commentators to provide a thorough and expansive overview of automotive detailing techniques. From the pre-wash, wash and preparation stages, through machine polishing to paint protection and maintenance, every detailing stage is covered: surface types,

contaminants and products are analysed, before the actual processes are laid bare. In the age of the internet and social media, a plethora of detailing knowledge is available online, yet it is strangely difficult to discover completely, or harness usefully. This book redresses the balance. Aimed at motoring enthusiasts, car mechanics, restorers, valets and those thinking of setting up a valeting/car detailing business and illustrated throughout with 268 colour photographs and 36 line artworks.

E-Lexicography-Pedro A. Fuertes-Olivera
2011-10-20 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: □ Polyfunctional versus monofunctional dictionary tools □ Developing theories of lexicography for electronic mediums □ Distinguishing between the database and the dictionary □ Online dictionaries not as data

repositories but as sophisticated search engines
This volume will appeal to scholars in lexicography and to practicing lexicographers.

The Home Front in Britain-Maggie Andrews
2014-10-30 This collection of fourteen,
academically rigorous and accessible chapters
explores the British Home Front in the last 100

years since the outbreak of WW1. The wide range of case studies include war widows allowances, Landgirls, the role of factory inspectors in WW1 and canal boat women, national savings, Guernsey evacuees and clothes rationing in WW2. The meaning and images of the British home and family in times of war are interrogated in the past and in contemporary culture to challenge prevalent myths of how working and domestic life shifted in times of national conflict. This volume is intended to encourage a reappraisal of the place of the Home Front in British conceptualisations of war and conflict.

From these ancestors they've inherited magical powers of transformation, the ability to cast spells from the Book of Thoth, and, as they will soon learn, the responsibility of protecting the world from the evil forces of Chaos.

How Our Army Grew Wings-Charles de Forest Chandler 1979

Codex Born-Jim C. Hines 2013-08-06 Hugo winner Jim C. Hines's hilarious and clever Magic ex Libris series, where books come alive and libromancer Isaac Vainio combats magical threats that spring from the page Five hundred years ago, Johannes Gutenberg discovered the art of libromancy, allowing him to reach into books to create things from their pages. Gutenberg's power brought him many enemies, and some of those enemies have waited centuries for revenge. Revenge which begins with the brutal slaughter of a wendigo in the northern Michigan town of Tamarack, a long-established werewolf territory. Libromancer Isaac Vainio is part of Die Zwelf Portenære, better known as the Porters, the organization founded by Gutenberg to protect the world from magical threats. Isaac is called in to investigate the killing, along with Porter psychiatrist Nidhi Shah and their dryad bodyguard and lover, Lena Greenwood. Born decades ago from the pages of a pulp fantasy novel, Lena was created to be the ultimate fantasy woman, strong and deadly, but shaped by

the needs and desires of her companions. Her powers are unique, and Gutenberg's enemies hope to use those powers for themselves. But their plan could unleash a far darker evil...

Drinking Water Health Advisory-Welford C. Roberts 1992-06-16 The United States Environmental Protection Agency (U.S. EPA) Office of Water (OW) initiated the Health Advisory Program in 1978 to provide information and guidance to individuals or agencies concerned with potential risk from drinking water contaminants for which no national regulations currently exist. Since that time, over 100 Health Advisories (HAs) have been published in final form for inorganic, organic, and microbial contaminants. This volume contains HAs for munitions chemicals developed as part of a Memorandum of Understanding between the U.S. EPA and the Department of the Army. To develop each HA, the authors reviewed

toxicological data for each chemical and presented the relevant studies to allow an evaluation of the data without continued reference to the primary documents. Each HA has undergone critical internal review by the OW Toxicology Review Panel, EPA program offices, the EPA Reference Dose (RfD) Committee, the EPA Carcinogen Risk Assessment and Verification Enterprise (CRAVE) Committee, and the Army Medical Department (for munitions chemicals only). Finally, the HAs were reviewed by an external panel of experts in toxicology and risk assessments. Drinking Water Health Advisory: Munitions will be an important reference document for all DOD/DOE hazardous waste sites, drinking water professionals, and academic libraries.
