The Development Dictionary-Wolfgang Sachs
2010-01-15 In this classic collection, some of the world's most eminent critics of development review the key concepts of the development discourse. Each essay examines one concept from a historical and anthropological point of view, highlights its particular bias, and exposes its historical obsolescence and intellectual sterility. The authors argue that a bidding farewell to the whole Eurocentric development idea is urgently needed, in order to liberate people’s minds in both North and South for bold responses to the environmental and ethical challenges now confronting humanity. The combined result forms a must-read invitation to experts, grassroots movements and
students of development to recognize the tainted glasses they put on whenever they participate in the development discourse.

**The Development Dictionary** - Wolfgang Sachs

1992 In this pioneering collection, some of the world's most eminent critics of development review the key concepts of the development discourse in the post-war era. Each essay examines one concept from a historical and anthropological point of view and highlights its particular bias. Exposing their historical obsolescence and intellectual sterility, the authors call for a bidding farewell to the whole Eurocentric development idea. This is urgently needed, they argue, in order to liberate people's minds - in both North and South - for bold responses to the environmental and ethical challenges now confronting humanity. These essays are an invitation to experts, grassroots movements and students of development to recognize the tainted glasses they put on whenever they participate in the development discourse.

**The Development Dictionary @25** - Aram Ziai

2020-05-21 Few books in the history of Development Studies have had an impact like The Development Dictionary – A Guide to Knowledge as Power, which was edited by Wolfgang Sachs and published by Zed Books in 1992. The Development Dictionary was crucial in establishing what has become known as the Post-Development (PD) school. This volume is devoted to the legacy of The Development Dictionary and to discussing Post-Development. This book originally published as a special issue of Third World Quarterly.

**The Development Dictionary** - Wolfgang Sachs

2019-09-15 The original critical guide to key concepts in development studies from some of the world's most eminent critical development scholars and practitioners. Each essay in this now classic collection examines one key
development concept, from the ‘environment’ to ‘needs’ and ‘progress’ to ‘production’. Each concept is reviewed from a historical and anthropological point of view, with particular bias and intellectual flaws being highlighted. Overall, the authors argue that we must bid farewell to the whole idea of Eurocentric development in order to liberate people’s minds in both North and South and to mobilize for bold responses to the environmental and ethical challenges now confronting humanity. The result is an indispensable resource for scholars, practitioners, movements and students of development which invites us to recognize the tinted glasses we put on whenever we participate in the development discourse.

The Making of the Oxford English Dictionary - Peter Gilliver 2016-09-22 This book tells the history of the Oxford English Dictionary from its beginnings in the middle of the nineteenth century to the present. The author, uniquely among historians of the OED, is also a practising lexicographer with nearly thirty years' experience of working on the Dictionary. He has drawn on a wide range of sources—including previously unexamined archival material and eyewitness testimony—to create a detailed history of the project. The book explores the cultural background from which the idea of a comprehensive historical dictionary of English emerged, the lengthy struggles to bring this concept to fruition, and the development of the book from the appearance of the first printed fascicle in 1884 to the launching of the Dictionary as an online database in 2000 and beyond. It also examines the evolution of the lexicographers' working methods, and provides much information about the people—many of them remarkable
individuals—who have contributed to the project over the last century and a half.

Architecture and Space Re-imagined—Richard Bower 2016-06-10 As with so many facets of contemporary western life, architecture and space are often experienced and understood as a commodity or product. The premise of this book is to offer alternatives to the practices and values of such westernised space and Architecture (with a capital A), by exploring the participatory and grass-roots practices used in alternative development models in the Global South. This process re-contextualises the spaces, values, and relationships produced by such alternative methods of development and social agency. It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory, questioning whether we might challenge the space and architectures of capitalist development by learning from the places and practices of others. Exploring these themes offers a critical examination of alternative development practices methods in the Global South, re-contextualising them as architectural engagements with socio-political space. The comparison of such interdisciplinary contexts and discourses reveals the political, social, and economic resonances inherent between these previously unconnected spatial protagonists. The interdependence of spatial issues of choice, value, and identity are revealed through a comparative study of the discourses of Henri Lefebvre, John Turner, Doreen Massey, and Nabeel Hamdi. These key protagonists offer a critical framework of discourses from which further connections to socio-spatial discourses and concepts are made, including post-marxist theory, orientalism, post-structural pluralism, development anthropology, post-colonial theory, hybridity, difference and subalternity. By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and
other spatial and political practices. In exploring the methodologies, implications and values of such participatory development practices, this book ultimately seeks to articulate the positive potential and political of learning from the difference, multiplicity, and otherness of development practice in order to re-imagine architecture and space.

**Mapping South-South Connections** - Fernanda Peñaloza 2019-03-15 This book explores contemporary cultural, historical and geopolitical connections between Latin America and Australia from an interdisciplinary perspective. It seeks to capitalise on scholarly developments and further unsettle the multiple divides created by the North-South axis by focusing on processes of translocal connectivities that link Australia with Latin America. The authors conceptualise the South-South not as a defined geographic space with clear boundaries, but rather as a mobile terrain with multiple, evolving and overlapping translocal processes.

**Northeast India** - Yasmin Saikia 2017-04-04 Northeast India: A Place of Relations focuses on encounters and experiences between people and cultures, the human and the non-human world, allowing for building of new relationships of friendship and amity in the region. The twelve essays in this volume explore the possibility of a new search enabling a 'discovery' of the lived and the loved world of Northeast India from within. The volume employs a variety of perspectives and methodological approaches - literary, historical, anthropological, interpretative politics, and an analytical study of contemporary issues, engaging the people, cultures, and histories in the Northeast with a new outlook. In the study, the region emerges as a place of new happenings in which there is the possibility of continuous expansion of the horizon of history and issues of current relevance facilitating new voices and
narratives that circulate and create bonding in the borderland of South, East, and Southeast Asia.

**Environmental and Climate Change in South and Southeast Asia** - 2014-08-12

**The Devil's Dictionary** - Ambrose Bierce 101-01-01
The Devil's Dictionary is a satirical dictionary written by American journalist and author Ambrose Bierce. Originally published in 1906 as The Cynic's Word Book, it features Bierce's witty and often ironic spin on many common English words.

**Forgotten Foundations of Bretton Woods** - Eric Helleiner 2014-04-18
Eric Helleiner's new book provides a powerful corrective to conventional accounts of the negotiations at Bretton Woods, New Hampshire, in 1944. These negotiations resulted in the creation of the International Monetary Fund and the World Bank—the key international financial institutions of the postwar global economic order. Critics of Bretton Woods have argued that its architects devoted little attention to international development issues or the concerns of poorer countries. On the basis of extensive historical research and access to new archival sources, Helleiner challenges these assumptions, providing a major reinterpretation that will interest all those concerned with the politics and history of the global economy, North-South relations, and international development. The Bretton Woods architects—who included many officials and analysts from poorer regions of the world—discussed innovative proposals that anticipated more contemporary debates about how to reconcile the existing...
liberal global economic order with the development aspirations of emerging powers such as India, China, and Brazil. Alongside the much-studied Anglo-American relationship was an overlooked but pioneering North-South dialogue. Helleiner’s unconventional history brings to light not only these forgotten foundations of the Bretton Woods system but also their subsequent neglect after World War II.

Critical Terms in Futures Studies-Heike Paul 2019-12-02 This volume provides the essential vocabulary currently employed in discourses on the future in 50 contributions by renowned scholars in their respective fields, which examine future imaginaries across cultures and time. Not situated in the field of “futurology” proper, it comes at future studies ‘sideways’ and offers a multidisciplinary treatment of a critical futures’ vocabulary. The contributors have their disciplinary homes in a wide range of subjects – history, cultural studies, literary studies, sociology, media studies, American studies, Japanese studies, Chinese studies, and philosophy - and critically illuminate numerous discourses about the future (or futures), past and present. In compiling such a critical vocabulary, this book seeks to foster conversations about futures in study programs and research forums and offers a toolbox for discussing them with an adequate degree of complexity.

The future of development-Esteva, Gustavo 2013-10-09 This book explains the origins of development and underdevelopment and offers a new vision for development, demystifying the statistics that international organizations use to measure development and introducing the alternative concept of buen vivir: the state of living well.

Environment, Politics and Activism-Somnath Batabyal 2015-07-17 This book examines the role of the media in environmental
have become a key element of development strategies across the Global South, despite remaining deeply controversial. Proponents hail them as an example of 'pro-poor' innovation, while critics regard them as a threat to food sovereignty and the environment. The promotion of biotechnology is an integral part of 'new Green Revolution for Africa' interventions and is also intimately linked to the rise of 'philanthrocapitalism,' which advances business solutions to address the problem of poverty. Through interviews with farmers, policymakers and agricultural scientists, Jacqueline Ignatova shows how efforts to transform the seed sector in northern Ghana – one of the key laboratories of this 'new Green Revolution' – may serve to exacerbate the inequality it was notionally intended to address. But she also argues that its effects in Ghana have been far more complex than either side of the debate has acknowledged, with local farmers proving adept at blending traditional and modern agricultural methods that subvert the interests of global agribusiness.

Contesting Africa’s New Green Revolution-Jacqueline A. Ignatova 2021-05-20
Genetically modified crops in the 21st century. It highlights how politics is mediated in myriad ways through newspapers and news channels, through mobile telephony and through social networking sites. Further, it shows how the media creates and influences relevant discourses, builds campaigns and awareness, and adopts and discards issues. With a range of perspectives on issues of environmental justice and equity, the volume scrutinizes how the media discourse on environment shapes our politics, and the role of international politics, finance, youth, newspapers, magazines and 24-hour television. Bringing together academics, activists and media persons, this highly topical book will serve as significant reading for researchers and scholars of development studies and media studies, as well as policymakers, NGOs and environmental campaigners.
The Sustainable Development Goals and Human Rights - Inga Winkler 2018-12-07 The Sustainable Development Goals (SDGs) were adopted in 2015. The SDGs make the central promise to Leave No One Behind and include a dedicated goal to reduce inequalities. Human rights advocates have put great hopes in the SDGs as an instrument for transformative change. But do they bring about the much-needed paradigm shift? Or were the extensive consultations and negotiations much ado about nothing? "Sustainable Development Goals and Human Rights: A Critical Early Review" follows two central lines of inquiry. The chapters examine to what extent do the SDGs live up to the promise to reduce inequalities and provide for monitoring and policies that address the needs of marginalized and invisible populations. They further suggest transparent and binding accountability processes and mechanisms to ensure that the SDGs are more than lofty goals and bring power to their promise. The volume begins with three chapters that focus on different aspects of SDG 10 and the commitment to reduce inequalities. From this cross cutting SDG, the following three chapters look at the translation of equality and accountability into specific sectors: health (SDG 3) and labour (SDG 8). The chapters were originally published in a special issue of The International Journal of Human Rights.

The World Bank and Transferring Development - Adrian Robert Bazbauers 2017-08-20 This book analyses the World Bank’s provision of technical assistance from 1946 to the present day. It argues that the relational dynamics between technical assistance provider and recipient affects the legitimacy of policy norms travelling from the
‘international’ to the ‘domestic’. Beginning from the constructivist position that ‘development’ is a social construct, the author contends that successful policy movement via technical assistance depends on the recipient’s perception of the validity of policy reforms, with perception being influenced by the way those ideas and practices are presented, packaged, and transferred. In advancing this argument, Bazbauer analyses four pillars of World Bank technical assistance: technical assistance components (advisory services incorporated within lending operations), stand-alone technical assistance projects (projects designed to solely deliver technical assistance), survey missions (activities involved in measuring the development status of developing countries), and training institutes (the courses of the Economic Development Institute and World Bank Institute).

Development is an essential introduction to the subject for students, potential practitioners, and activists interested in community action and emancipatory social change. It reflects on the underlying principles of development: what development is, why it is promoted and the implications for practice, indicating potential strategies and goals.

A Dictionary of Environment and Conservation-Michael Allaby 2013-01-10 With over 8500 entries, this informative dictionary addresses the social, legal, political and economic aspects of the environment and conservation as well as the scientific terms.

The Routledge Handbook of Critical Resource Geography-Matthew Himley 2021-07-13 This Handbook provides an essential guide to the study of resources and their role in socio-environmental change. With original contributions from more than 60 authors with
expertise in a wide range of resource types and world regions, it offers a toolkit of conceptual and methodological approaches for documenting, analyzing, and reimagining resources and the worlds with which they are entangled. The volume has an introduction and four thematic sections. The introductory chapter outlines key trajectories for thinking critically with and about resources. Chapters in Section I, "(Un)knowing resources," offer distinct epistemological entry points and approaches for studying resources. Chapters in Section II, "(Un)knowing resource systems," examine the components and logics of the capitalist systems through which resources are made, circulated, consumed, and disposed of, while chapters in Section III, "Doing critical resource geography: Methods, advocacy, and teaching," focus on the practices of critical resource scholarship, exploring the opportunities and challenges of carrying out engaged forms of research and pedagogy. Chapters in Section IV, "Resource-making/world-making," use case studies to illustrate how things are made into resources and how these processes of resource-making transform socio-environmental life. This vibrant and diverse critical resource scholarship provides an indispensable reference point for researchers, students, and practitioners interested in understanding how resources matter to the world and to the systems, conflicts, and debates that make and remake it.

The SAGE Handbook of International Social Work
Karen H Lyons 2012-05-03
Social work is a profession that is increasingly involved with issues which have a global dimension. This Handbook tackles the global/local aspect of social work in its various forms and interrogates the key concerns that societies are facing through an international lens. The contributors show that, with an appreciation of commonalities and differences, local practices and appropriate forms of international activity can be better developed. Areas
covered include: - Analysis of 'International social work' - Globalisation and indigenisation - Social justice and human rights - Poverty and livelihoods - Ecological issues - Migration - Education, theory, research and practice - Social work in different settings - Religion and spirituality - Responses to disasters and conflicts - Life course perspectives - Regional perspectives - Future directions With a truly international range of contributions, the Handbook incorporates perspectives from Asia, Africa, Europe, Australasia, the Middle East and the Americas. It will be an invaluable resource for undergraduates, postgraduates, researchers and academics working in the fields of social work, social welfare, human services, and community development worldwide, as well as service providers and policy makers in the international arena.

An American Dictionary of the English Language- Noah Webster 1830

In the Name of the Nation-Sanjib Baruah 2020-02-04 In India, the eight states that border Myanmar, Bangladesh, Bhutan and the Tibetan areas of China are often referred to as just "the Northeast." In the Name of the Nation offers a critical and historical account of the country's troubled relations with this borderland region. Its modern history is shaped by the dynamics of a "frontier" in its multiple references: migration and settlement, resource extraction, and regional geopolitics. Partly as a result of this, the political trajectory of the region has been different from the rest of the country. Ethnic militias and armed groups have flourished for decades, but they coexist comfortably with functioning electoral institutions. The region has some of India's highest voter turnout rates, but special security laws produce significant democracy deficits that are now almost as old as the Republic. That these policies have been enforced to foment national unity while multiple alternative conceptions of the "nation" animate politics in the region forces us to reflect.
on the very foundations of the nation form. Sanjib Baruah offers a nuanced account of this impossibly complicated story, asking how democracy can be sustained, and deepened, in these conditions.

**Global Perspectives on Development Administration and Cultural Change** - Afolayan, Gbenga Emmanuel 2016-08-30 As countries around the world make continuous strides in developing their economies, it has become increasingly important to evaluate the different ways culture impacts the growth of a region. Global Perspectives on Development Administration and Cultural Change investigates the impact of economic growth on different demographics throughout the world.

Identifying theoretical concepts and notable topics in the areas of economic development, organizational culture, and cultural shifts, this book is an essential reference source for policymakers, development planners, international institutions, public policy analysts, administrators, researchers, and NGOs.

**A Changing Environment for Human Security** - Linda Sygna 2013-06-26 Environmental change presents a new context and new opportunities for transformational change. This timely book will inspire new ways of understanding the relationship between environmental change and human security. A Changing Environment for Human Security: Transformative Approaches to Research, Policy and Action both supports and informs a call for new, transformative approaches to research, policy and action. The chapters in this book include critical analyses, case studies and reflections on contemporary environmental
and social challenges, with a strong emphasis on those related to climate change. Human thoughts and actions have contributed to an environment of insecurity, manifested as multiple interacting threats that now represent a serious challenge to humanity. Yet humans also have the capacity to collectively transform the economic, political, social and cultural systems and structures that perpetuate human insecurities. These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers – whether students, researchers, policy makers, or practitioners – to think differently about environmental issues and sustainability. The contributions show that in a changing environment, human security is not only a possibility, but a choice.

**Elsevier's Dictionary of Medicine and Biology**

Dictionaries are didactic books used as consultation instruments for self-teaching. They are composed by an ordered set of linguistic units which reflects a double structure, the macrostructure which correspond to the word list and the microstructure that refers to the contents of each lemma. The great value of dictionaries nests in the fact that they establish a standard nomenclature and prevent in that way the appearance of new useless synonyms. This dictionary contains a total of about 27,500 main English entries, and over of 130,000 translations that should normally sufficiently cover all fields of life sciences. The basic criteria used to accept a word a part of the dictionary during the development period in order of importance were usage, up-to-dateness, specificity, simplicity and conceptual relationships. The dictionary meets the standards of higher education and covers all main fields of life sciences by setting its primary focus on the vastly developing fields of cell biology, biochemistry, molecular biology, immunology, developmental biology, microbiology, genetics and also the fields of
human anatomy, histology, pathology, physiology, zoology and botany. The fields of ecology, paleontology, systematics, evolution, biostatistics, plant physiology, plant anatomy, plant histology, biometry and lab techniques have been sufficiently covered but in a more general manner. The latest Latin international anatomical terminology "Terminologia Anatomica" or "TA" has been fully incorporated and all anatomical entries have been given their international Latin TA synonym. This dictionary will be a valuable and helpful tool for all scientists, teachers, students and generally all those that work within the fields of life sciences.

Globalization, Violence and World Governance-Laura Westra 2011-02-14 In this work Laura Westra draws our attention to the failure of international law to promote and protect the rights of society in the face of the ravages of neoliberal agendas in an era of globalization. This book outlines how international law is perhaps a misnomer, and at its core there is a great distance between laws as they are written and laws as they are implemented.

The Good Holiday-João Afonso Baptista 2017-05-01 Drawing on ethnographic research in the village of Canhane, which is host to the first community tourism project in Mozambique, The Good Holiday explores the confluence of two powerful industries: tourism and development, and explains when, how and why tourism becomes development and development, tourism. The volume further explores the social and material consequences of this merging, presenting the confluence of tourism and development as a major vehicle for the exercise of ethics, and non-state governance in contemporary life.

Contesting Africas New Green Revolution-Jacqueline Ignatova 2021-05-20 'In this insightful critique of
arguments for and against GMOs as a remedy for poverty, inequality and hunger in Africa, Ignatova illuminates the way the “new Green Revolution” serves as a vehicle for philanthrocapital - generating markets and wealth for global agribusiness in the name of “pro-poor” development.’ Sara Berry, Professor Emeritus, John Hopkins University, USA 'Ignatova’s important book illuminates profound problems with public-private partnerships that skirt democratic accountability and empower wealthy interests at the expense of local communities. But it’s not a despairing account: she centres Ghanaian activists and policy-makers who are pioneering a new type of philanthropy, one emphasizing interdependency and social justice over anti-democratic efforts to privatize seed commons. A revelatory and insightful study.' Linsey McGoey, Professor of Sociology, University of Essex, UK ‘Like a combine through a field of genetically modified maize, Jacqueline Ignatova cuts through the rhetoric surrounding the ‘Green Revolution for Africa’ to reveal the underlying power, politics and inequities that shape agricultural development in contemporary Ghana. Full of rich empirics and analytical insights, this book is essential reading for those seeking a comprehensive understanding of how public-private partnerships and philanthropy-driven initiatives are reshaping smallholder agriculture across the African continent.’ Marcus Taylor, Associate Professor and Head of Department, Global Development Studies, Queen’s University, Canada

A Dictionary of Education-Susan Wallace 2015-01-22 "Up-to-date coverage of all aspects of education"--Cover.

Heidegger and Development in the Global South-Siby K. George 2015-03-05 Taking the Heideggerian critical ontology of technology as its base, this volume looks at postcolonial modernization and development in the global
south as the worldwide expansion of the western metaphysical understanding of reality. We live today in an increasingly globalizing technological society that Martin Heidegger described in the middle of the last century as ‘the planetary imperialism of technologically organized man.’ Consequent upon this cultural-intellectual globalization, the ahistorical, violent, individualistic, calculative and capitalistic logic of the metaphysics of technology is permeating the life-world, even of the world’s poorest peoples, in ways they could neither choose nor control. This volume questions the political ethics and justice of post-war development discourse in the light of the egalitarian aims of modern societies, cultural freedom of communities and nations and the ecological limits of the planet. The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non-human life and non-living beings. This unique volume is the first book-length treatment of the ontology of modernization and development in the global south from a Heideggerian stance.

**Debating Development Discourse**-David B. Moore 2016-07-27 This book combines critical historical analysis and case studies of the theory and practice of post-1945 international development. Beginning with a Gramscian analysis of institutional and academic development discourse, continuing with critiques of international institutions' current neo-liberal economic and 'governance' practices, and followed by studies of African moral opposition to structural adjustment's 'scientific capitalism', South African housing struggles, Zimbabwean development strategies, Costa Rican agrarian NGO's, and northern Albertan public environmental hearings, it advocates deepening radical and popular participatory democracy.

**The Essential Guide to Critical Development**
Studies-Henry Veltmeyer
2021-09-30 The Essential Guide to Critical Development Studies provides an up-to-date and authoritative introduction to the field, challenging mainstream development discourse and the assumptions that underlie it. Critical development studies lays bare the economic, political, social, and environmental crises that characterise the current global capitalist system, proposing instead systemic change and different pathways for moving beyond capitalism into a new world of genuine progress where economic and social justice and ecological integrity prevail. In this book, the authors challenge market-driven, neoliberal development agendas, incorporating analyses of class, gender, race, and the dynamics of uneven capitalist development. This thoroughly revised and expanded second edition includes: • 18 new chapters, including on topics such as philanthrocapitalism, race, the energy transition, Indigenous resistance and resilience, and global health • Expanded global coverage, including new chapters on South Africa, North Africa, and the Gulf Arab states • A new section on resistance and alternatives • Additional pedagogical features, including a glossary of key terms, discussion questions, and expanded guides for further reading. This textbook will be essential reading for students of global development, political science, sociology, economics, gender studies, geography, history, anthropology, agrarian studies, international political economy, and area studies. It will also be an important resource for development researchers, practitioners, and policymakers.

Development beyond Politics-Thomas Yarrow
2011-07-28 Is 'development' the answer for positive social change or a cynical western strategy for perpetuating inequality? Moving beyond an increasingly entrenched debate about the role of NGOs, this book reveals the practices and social relations through which ideas of development are concretely
enacted.
