Genetic engineering of animals: Ethical issues, including
The genetic engineering of animals has increased significantly in recent years, and the use of this technology brings with it ethical issues, some of which relate to animal welfare — defined by the World Organisation for Animal Health as "the state of the animal...how an animal is coping with the conditions in which it lives". These issues need to be considered by all stakeholders

Ethical egoism - Wikipedia
Ethical egoism is the normative ethical position that moral agents ought to act in their own self-interest. It differs from psychological egoism, which claims that people can only act in their self-interest. Ethical egoism also differs from rational egoism, which holds that it is rational to act in one's self-interest. Ethical egoism holds, therefore, that actions whose consequences will
