<b>Criminal Case 40/61, the Trial of Adolf Eichmann</b> -Harry Mulisch 2009-04-24 The trial of Adolf Eichmann began in 1961 under a deceptively simple label, "criminal case 40/61." Hannah Arendt covered the trial for the New Yorker magazine and recorded her observations in Eichmann in Jerusalem: The Banality of Evil. Harry Mulisch was also assigned to cover the trial for a Dutch news weekly. Arendt would later say in her book's preface that Mulisch was one of the few people who shared her views on the character of Eichmann. At the time, Mulisch was a young and little-known writer; in the years since he has since emerged as an author of major international importance, celebrated for such novels as The Assault and The Discovery of Heaven. Mulisch modestly called his book on case 40/61 a report, and it is certainly that, as he gives firsthand accounts of the trial and its key players and scenes (the defendant's face strangely asymmetric and riddled by tics, his speech absurdly baroque). Eichmann's character comes out in his incessant bureaucratizing and calculating, as well as in his grandiose visions of himself as a Pontius Pilate-like innocent. As Mulisch intersperses his dispatches from Jerusalem with meditative accounts of a divided and ruined Berlin, an eerily rebuilt Warsaw, and a visit to the gas chambers of Auschwitz, Criminal Case 40/61, the Trial of Adolf Eichmann becomes as a disturbing and highly personal essay on the Nazi extermination of European Jews and on the human capacity to commit evil ever more efficiently in an age of technological advancement. Here presented with a foreword by Debrah Dwork and translated for the first time into English, Criminal Case 40/61 provides the reader with an unsettling portrait not only of Eichmann's character but also of technological precision and expertise. It is a landmark of Holocaust writing.

<b>American Civil War Armies (4)</b> -Philip Katcher 2013-06-20 The War between the States' is the term used for the American Civil War throughout much of the South even today. Many of the states agreed; the state governments raising their own units, commissioning their officers, and supplying their men. Indeed, many of the units that fought the Civil War were supplied in large part by their own states rather than by the central government's quartermasters. Philip Katcher's fascinating text explores the uniforms of 32 states; from Alabama to Wisconsin.

<b>Alta Vendita</b> -John Vennari 2016-07-11 The Permanent Instruction of the Alta Vendita is a document, originally published in Italian in the 19th century, purportedly produced by the highest lodge of the Italian Carbonari and written by "Piccolo Tigre," codename for Giuseppe Mazzini. The document details an alleged Masonic plan to infiltrate the Catholic Church and spread liberal ideas within it. The Carbonari had strong similarities to Freemasonry and so the document is seen by some as a Masonic document. In the 19th century, Pope Pius IX[3] and Pope Leo XIII both asked for it to be published.

**Designing and Evaluating Usable Technology in Industrial Research**-Clare-Marie Karat 2010 This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

**Watching with The Simpsons**-Jonathan Gray 2012-10-12 Using our favourite Springfield family as a case study, Watching with The Simpsons examines the textual and social role of parody in offering critical commentary on other television programs and genres. Jonathan Gray brings together textual theory, discussions of television and the public sphere, and ideas of parody and comedy. Including primary audience research, it focuses on how The Simpsons has been able to talk back to three of television's key genres - the sitcom, adverts and the news - and on how it holds the potential to short-circuit these genre's meanings, power, and effects by provoking reinterpretations and offering more media literate recontextualizations. Examining television and media studies theory, the text of The Simpsons, and the show's audience, Gray attempts to fully situate the show's parody and humour within the lived realities of its audiences. In doing so, he further explores the possibilities for popular entertainment television to discuss issues of political and social importance. A must read for any student of media studies.

**Ceramic Integration and Joining Technologies**-Mrityunjay Singh 2011-09-26 This book joins and integrates ceramics and ceramic-based materials in various sectors of technology. A major imperative is to extract scientific information on joining and integration response of real, as well as model, material systems currently in a developmental stage. This book envisions integration in its broadest sense as a fundamental enabling technology at multiple length scales that span the macro, millimeter, micrometer and nanometer ranges. Consequently, the book addresses integration issues in such diverse areas as space power and propulsion, thermoelectric power generation, solar energy, micro-electro-mechanical systems (MEMS), solid oxide fuel cells (SOFC), multi-chip modules, prosthetic devices, and implanted biosensors and stimulators. The engineering challenge of designing and manufacturing complex structural, functional, and smart components and devices for the above applications from smaller, geometrically simpler units requires innovative development of new integration technology and skillful adaptation of existing technology.

**Elephants Among Us**-M. Jaynes 2013-05-31 Born in the 1970s, Stoney the elephant spent his life traveling and performing with his family. In 1994, he was injured while working in Las Vegas. He died after a nearly year-long medical confinement in a storage barn behind a hotel. The pages within chronicle his short life and tell the complex story of the people who knew him and those who tried to save him. Stoney is the most important elephant you've never heard of. Also within is the story of the elephant Big Mary, who in 1916 was hanged from a railroad derrick after killing a man in Tennessee. Here an effort is made to combine previous scholarship into a new considered retelling, with the elephant as the core of its focus. Big Mary died at the beginning of the twentieth century, Stoney at the end of it. Both performing elephants underwent disaster, and both can tell us something about ourselves.

**The Story Is the Thing**-Amy Hale Auker 2018-10-10 The Willa Literary Award Finalist for Original Softcover Fiction, 2015, Awarded by the Women Writing the West "Uncle Bill" Morgan knew about love and loss. Cody Jack needed more -- more of everything that soothed and comforted and numbed -- but he stood to lose the only good thing he'd ever known and he would hurt anyone to keep it. The old cowboy is gone, but he left his story behind. It is a story of love, loss and life lessons, of confession and absolution, a story of poetry and rescue, a story of loneliness and a story of coming together. And, after all, the story is the thing.
