The Renaissance World: John Jeffries Martin
2015-01-09 With an interdisciplinary approach that encompasses the history of ideas, political history, cultural history and art history, this volume, in the successful Routledge Worlds series, offers a sweeping survey of Europe in the Renaissance, from the late thirteenth to early seventeenth centuries, and shows how the Renaissance laid key foundations for many aspects of the modern world. Collating thirty-four essays from the field's leading scholars, John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social, economic and technological forces alongside a cluster of interrelated practices including painting, sculpture, humanism and science, in which the elites engaged. Unique in its balance of emphasis on elite and popular culture, on humanism and society, and on women as well as men, The Renaissance World grapples with issues as diverse as Renaissance patronage and the development of the slave trade. Beginning with a section on the antecedents of the Renaissance world, and ending with its lasting influence, this book is an invaluable read, which students and scholars of history and the Renaissance will dip into again and again.

Islamic Science and the Making of the European Renaissance-George Saliba 2011-01-21 The rise and fall of the Islamic scientific tradition, and the relationship of Islamic science to European science during the Renaissance. The Islamic scientific tradition has been described many times in accounts of Islamic civilization and general histories of science, with most authors tracing its beginnings to the appropriation of ideas from other ancient civilizations—the Greeks in particular. In this thought-provoking and original book, George Saliba argues that, contrary to the generally accepted view, the foundations of Islamic scientific thought were laid well before Greek sources were formally translated into Arabic in the ninth century. Drawing on an account by the tenth-century intellectual historian Ibn al-Naidm that is ignored by most modern scholars, Saliba suggests that early translations from mainly Persian and Greek sources outlining elementary scientific ideas for the use of government departments were the impetus for the development of the Islamic scientific tradition. He argues further that there was an organic relationship between the Islamic scientific thought that developed in the later centuries and the science that came into being in Europe during the Renaissance. Saliba outlines the conventional accounts of Islamic science, then discusses their shortcomings and proposes an alternate narrative. Using astronomy as a template for tracing the progress of science in Islamic civilization, Saliba demonstrates the originality of Islamic scientific thought. He details the innovations (including new mathematical tools) made by the Islamic astronomers from the thirteenth to sixteenth centuries, and offers evidence that Copernicus could have known of and drawn on their work. Rather than viewing the rise and fall of Islamic science from the often-narrated perspectives of politics and religion, Saliba focuses on the scientific production itself and the complex social, economic, and intellectual conditions that made it possible.

Manifesto for a European Renaissance-Alain De Benoist 2012-06 This manifesto remains the only attempt to date by GRECE, the primary New Right organization in France, to summarize its principles and key concepts. It was written in 1999 by Alain de Benoist, GRECE's founder, and Charles Champetier on the occasion of GRECE's thirtieth anniversary. It offers a strong argument in favor of the right to difference among cultures and civilizations, and the right of peoples to defend themselves from cultural homogenization. It also offers a vision of a regenerated Europe which will find its strength in a return to its authentic values and traditions, in opposition to the new imperialism of multiculturalism and the global marketplace. Alain de Benoist (b. 1943) is the primary philosopher of the European ‘New Right’ movement. He attended the Sorbonne, studying law, philosophy and religion. He is the author of dozens of books, including The Problem of Democracy and Beyond Human Rights, published in English translation by Arktos, and gives frequent lectures around the world. He lives in Paris. Charles Champetier (b. 1968) is the former editor of Elements, one of GRECE's periodicals. He continues to write on subjects related to the New Right."

Women in Italian Renaissance Culture and Society-Letizia Panizza 2017-12-02 "An impressive collection of 29 essays by British, American and Italian scholars on important historical, artistic, cultural, social, legal, literary and theatrical aspects of women's contributions to the Italian Renaissance, in its broadest sense. Many contributions are the result of first-hand archival research and are illustrated with numerous unpublished or little-known reproductions or original material. The subjects include: women and the court ( Dilwyn Knox, Evelyn S Welch, Francine Daenens and Diego Zancani ); women and the church ( Gabriella Zarri, Victoria Primhak, Kate Lowe, Francesca Medioli and Ruth Chavasse ); legal constraints and ethical precepts ( Marina Graziosi, Christine Meek, Brian Richardson, Jane Bridgeman and Daniela De Bellis ); female models of comportment ( Marta Ajmarm Paola Tinagli and Sara F Matthews Grieco ); women and the stage ( Richard Andrews, Maggie Guensbergberg, Rosemary E Bancroft-Marcus ); women and letters ( Diana Robin, Virginia Cox, Pamela J Benson, Judy Rawson, Conor Fahy, Giovanni
Imagined Histories - Anthony Molho 1998 This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabrielle Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zizak, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck. Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.

A Companion to the Worlds of the Renaissance - Guido Ruggiero 2008-04-15 This volume brings together some of the most exciting renaissance scholars to suggest new ways of thinking about the period and to set a new series of agendas for Renaissance scholarship. Overturns the idea that it was a period of European cultural triumph and highlights the negative as well as the positive. Looks at the Renaissance from a world, as opposed to just European, perspective. Views the Renaissance from perspectives other than just the cultural elite. Gender, sex, violence, and cultural history are integrated into the analysis.

The Eagle and the Dragon - Serge Gruzinski 2015-01-13 In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

A Companion to Renaissance and Baroque Art - Babette Bohn 2013-03-04 Through the masterpieces produced by artists ranging from Michelangelo and Leonardo to Rembrandt, Rubens, and Vermeer, Europe's Renaissance and Baroque period grew into one of the most creative times in world history. "A Companion to Renaissance and Baroque Art" presents a comprehensive collection of interdisciplinary essays that address major aspects of European visual arts produced from approximately 1300 to 1700, a period of artistic flourishing that many consider the beginning of modern history. These essays, however, transcend the traditional period
labels of "Renaissance" and "Baroque" by addressing works from Duccio and Chaucer to Velázquez and Newton as a single continuum, inclusive in terms of both disciplinary and geographical boundaries, as an era best characterized as "early modern." Featuring original contributions by an international roster of scholars from various disciplines, writings are grouped by concept in five sections that spotlight the varied components and processes that constitute the world of the visual arts and the variety of interpretive methods and ideas that can be, and have been, brought to bear on art objects. Essays explore how art interacts with the cultural paradigms of this explosive time: the interface between art and religion, art and science, and gender and sexuality to name a few. Combining an unprecedented breadth of coverage and depth of scholarship with lucid and accessible writing, "A Companion to Renaissance and Baroque Art" represents the most comprehensive reference on the study of Renaissance and Baroque visual arts available today.

Byzantine Art and Renaissance Europe
Angeliki Lymberopoulou 2016-12-05 Byzantine Art and Renaissance Europe discusses the cultural and artistic interaction between the Byzantine east and western Europe, from the sack of Constantinople by the Fourth Crusade in 1204 to the flourishing of post-Byzantine artistic workshops on Venetian Crete during the fifteenth and sixteenth centuries and the formation of icon collections in Renaissance Italy. The contributors examine the routes by which artistic interaction may have taken place, and explore the reception of Byzantine art in western Europe, analysing why artists and patrons were interested in ideas from the other side of the cultural and religious divide. In the first chapter, Lyn Rodley outlines the development of Byzantine art in the Palaiologan era and its relations with western culture. Hans Bloemsma then re-assesses the influence of Byzantine art on early Italian painting from the point of view of changing demands regarding religious images in Italy. In the first of two chapters on Venetian Crete, Angeliki Lymberopoulou evaluates the impact of the Venetian presence on the production of fresco decorations in regional Byzantine churches on the island. The next chapter, by Diana Newall, continues the exploration of Cretan art manufactured under the Venetians, shifting the focus to the bi-cultural society of the Cretan capital Candia and the rise of the post-Byzantine icon. Kim Woods then addresses the reception of Byzantine icons in western Europe in the late Middle Ages and their role as devotional objects in the Roman Catholic Church. Finally, Rembrandt Duits examines the status of Byzantine icons as collectors’ items in early Renaissance Italy. The inventories of the Medici family and other collectors reveal an appreciation for icons among Italian patrons, which suggests that received notions of Renaissance tastes may be in need of revision. The book thus offers new perspectives and insights and re-positions late and post-Byzantine art in a broader European cultural context.

**A Companion to the Spanish Renaissance** - Hilaire Kallendorf 2021-07-16 A Companion to the Spanish Renaissance makes a renewed case for the inclusion of Spain within broader European Renaissance movements. This interdisciplinary volume offers a snapshot of the best new work being done in this area.

**The Renaissance Restored** - Matthew Hayes 2021-07-27 This handsomely illustrated volume traces the intersections of art history and paintings restoration in nineteenth-century Europe. Repairing works of art and writing about them—the practices that became art conservation and art history—share a common ancestry. By the nineteenth century the two fields had become inseparably linked. While the art historical scholarship of this period has been widely studied, its restoration practices have received less scrutiny—until now. This book charts the intersections between art history and conservation in the treatment of Italian Renaissance paintings in nineteenth-century Europe. Initial chapters discuss the restoration of works by Giotto and Titian, framed by the contemporary scholarship of art historians such as Jacob Burckhardt, G. B. Cavalcaselle, and Joseph Crowe that was redefining the earlier age. Subsequent chapters recount how paintings conservation was integrated into museum settings. The narrative uses period texts, unpublished archival materials, and historical photographs in probing how paintings looked at a time when scholars were writing the foundational texts of art history, and how contemporary restorers were negotiating the appearances of these works. The book proposes a model for a new conservation history, object focused yet enriched by consideration of a wider cultural horizon.

**The Prince** - Niccolò Machiavelli 1910

**A Little History of the World** - E. H. Gombrich 2014-10-01 E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

**Petrarch and Boccaccio** - Igor Candido 2018-02-19 The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante’s encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his
contemporary age. The volume reconsiders Petrarch’s and Boccaccio’s heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

Asia in the Making of Europe - Donald Frederick Lach 1998 This monumental series, acclaimed as a “masterpiece of comprehensive scholarship” in the New York Times Book Review, reveals the impact of Asia’s high civilizations on the development of modern Western society. The authors examine the ways in which European encounters with Asia have altered the development of Western society, art, literature, science, and religion since the Renaissance. In Volume III: A Century of Advance, the authors have researched seventeenth-century European writings on Asia in an effort to understand how contemporaries saw Asian societies and peoples.

The Renaissance and Reformation in Northern Europe - Margaret McGlynn 2014-10-23 This updated version of Humanism and the Northern Renaissance now includes over 60 documents exploring humanist and Renaissance ideals, the zeal of religion, and the wealth of the new world. Together, the sources illuminate the chaos and brilliance of the historical period—as well as its failures and inconsistencies. The reader has been thoroughly revised to meet the needs of the undergraduate classroom. Over 30 historical documents have been added, including material by Martin Luther, John Calvin, John Knox, William Shakespeare, Christopher Columbus, Miguel de Cervantes, and Galileo Galilei. In the introduction, Bartlett and McGlynn identify humanism as the central expression of the European Renaissance and explain how this idea migrated from Italy to northern Europe. The editors also emphasize the role of the church and Christianity in northern Europe and detail the events leading up to the Reformation. A short essay on how to read historical documents is included. Each reading is preceded by a short introduction and ancillary materials can be found on UTP’s History Matters website (www.utphistorymatters.com).

Northern Renaissance Art - Susie Nash 2008-11-27 This book offers a wide-ranging introduction to the way that art was made, valued, and viewed in northern Europe in the age of the Renaissance, from the late fourteenth to the early years of the sixteenth century. Drawing on a rich range of sources, from inventories and guild regulations to poetry and chronicles, it examines everything from panel paintings to carved altarpieces. While many little-known works are foregrounded, Susie Nash also presents new ways of viewing and understanding the more familiar, such as the paintings of Jan van Eyck, Rogier van der Weyden, and Hans Memling, by considering the social and economic context of their creation and reception. Throughout, Nash challenges the perception that Italy was the European leader in artistic innovation at this time, demonstrating forcefully that Northern art, and particularly that of the Southern Netherlands, dominated visual culture throughout Europe in this crucial period.

Hans Holbein, the Younger, 1497-1543-Hans Holbein 1926

John Knox's History of the Reformation in Scotland-James Kirk 2013-12-05
A new scholarly, fully annotated edition of John Knox's classic History of the Reformation in Scotland is long overdue. Knox, a key figure in the international Reformation and the establishment of the Protestant Church in Scotland, began this work as a defence of the revolutionary stage of the Scottish Reformation (1558-60), and extended it to include accounts of earlier Scottish reformers and the personal rule of Mary Queen
of Scots (1561-1567). The 'History' is the premier contemporary narrative account of the Scottish Reformation and key to any study of the period. Its value is enhanced by Knox's inclusion of documentary sources (many of which are otherwise unrecorded), and its scope benefits from Knox's experience as a reformer in England, Germany and Switzerland. It is also an important source of information on Knox's career and his relationship with leading figures of his day. The last scholarly edition in the original orthography was edited by David Laing in 1847. The present edition aims to reproduce Knox's text using the earliest surviving manuscript, dated to 1566, taking account of variations in all other early manuscripts. The result is an extensive revision of the Laing text, which it will replace as the standard edition. This will be a vital requirement for all libraries and collections in religion and history throughout the world. The work includes an Introduction, full indexes to persons (with biographical details), places and subjects, over two hundred references to biblical quotations and allusions, a map and glossary.
