for granted circumstances of their daily lives. Precisely because it is not the same for everyone, the everyday becomes the ideal location for cultivating students’ intellectual capacities as well as their political investigations and interventions. In addition to exploring each concept in detail, each chapter includes up to five short recently published readings that illuminate an aspect of that concept. This Comprehensive Reader Sets Out to Provide a Map of the Development of Women’s Studies and the Ever Expanding Terrain That It Has Been Investigating Along the Continental Divide of the Field From the Origins of the 1970s to the Transformation Consequences of the 1990s. In Its Pages, the Often Elusive Relationships Between Women’s Studies, the Women’s Movement and Threshold Concepts in Women’s and Gender Studies

Threshold Concepts in Women’s and Gender Studies

Threshold Concepts in Women’s and Gender Studies: Ways of Seeing, Thinking, and Knowing, is a standalone design for introduction to Women’s and Gender Studies courses with the intent of providing both skills- and concept-based foundations for the field. The text is driven by a single key question: “What are the ways of thinking, seeing, and knowing that characterize women’s and gender studies and are valued by its practitioners?” Rather than following a topical approach, Threshold Concepts in Women’s and Gender Studies develops the key concepts and ways of thinking that students need in order to develop a deep understanding and in so doing transforms their discipline-oriented, across-disciplinary, book that illustrates two of the most critical concepts in women’s and gender studies: the social construction of gender and the dynamic nature of oppression.
