Pigeon Post-Arthur Ransome 2018-11-30 For anyone who loves sailing and adventure, Arthur Ransome's classic Swallows and Amazons series stands alone. Originally published in the UK over a half century ago, these books are still eagerly read by children, despite their length and their decidedly British protagonists. We attribute their success to two facts: first, Ransome is a great storyteller and, second, he clearly writes from first-hand experience. Independence and initiative are qualities any child can understand and every volume in this collection celebrates these virtues. The crew's on holiday for their sixth adventure, and they turn their energies to mining for gold, aided by pigeon messengers Homer, Sophocles, and Sappho. The adventurers comb the nearby

House of Lords - House of Commons - Joint Committee on the Draft Deregulation Bill:

Deregulation Bill - HL 101 - HC 925-Great Britain:

Parliament: Joint Committee on the Draft Deregulation Bill 2013-12-19 Having looked at the Draft Deregulation Bill in some detail and taken evidence from a wide range of witnesses, the Committee does not think it is appropriate for Ministers to be given power to scrap legislation by order on the subjective test that it is 'no longer of practical use'. There is a risk that to give Ministers that power would undermine effective Parliamentary scrutiny. It was also felt unnecessary when the Law Commissions currently have the power to put forward outdated Bills for abolition anyway. The Law Commissions will need to

make changes to their working practices in order to produce more frequent and more responsive Statute Law (Repeals) Bills. The Government should work with the Law Commissions to streamline the process for bringing forward these Bills. As for the duty on regulators to have regard to economic growth, whilst this is supported in principle, it is important that it is not used by Government to undermine the independence of regulators in the way it is implemented. It might be helpful if that provision were explicitly included in the Bill

Working-Class Organisations and Popular

Tourism, 1840-1970-Susan
Barton 2005-05-20 Today,
many people take the idea of
holidays for granted and
regard the provision of paid
time off as a right. This book
argues that popular tourism
has its roots in collective
organisation and charts the
development of the working
class holiday over two
centuries. This study recounts
how short, unpaid and often
unauthorised periods of leave
from work became organised
and legitimised through
legislation, culminating with
the Holidays with Pay Act of
1938. Moreover, this study
finds that it was through
collective activity by workers--
through savings clubs,
friendly societies and union
activity--that the working
class were originally able to
take holidays, and it was as a

result of collective bargaining
and campaigning that paid
holidays were eventually
secured for all.

The Cambridge Primary Review Research Surveys-Robin Alexander 2012-08-06
The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review - England's biggest enquiry into primary

education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports, including twenty-eight surveys of published research, provoking media headlines and public debate, before presenting its final report and recommendations. This book brings together the twenty-eight research surveys, specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated, to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections, covering:

So You Want to be a Medical Mum?-Emma Hill
2008-02-14 In 2006 over 60% of medical graduates in the UK were female, and the number of women going to medical school as 'mature students' is steadily increasing. Most of these women will, at some point, choose to have a baby, but the question always asked is 'How?' Not, of course, from a biological perspective, as doctors are all scientists at heart; but how do to fit it in with a medical career? Along with the problem of finding time to actually have a baby, and coping as a pregnant doctor, there is the problem of finding information when it is

most needed. This book addresses this problem, bringing a wealth of information together in one easy-to-use resource. Written by a new mother, who has faced the joys and frustrations of combining medicine and being a mother, this book is a "one stop shop" for all new mothers and mothers to be.

Independent Thinking on Emotional Literacy-Richard Evans 2020-11-10 Written by Richard Evans, Independent Thinking on Emotional Literacy: A passport to increased confidence, engagement and learning shares an approach that will help educators boost their pupils' emotional literacy, with the broader aim of nurturing a more grounded, engaged and intrinsically motivated child. Foreword by Ian Gilbert. Do teachers truly understand their pupils? And do the pupils themselves really understand their own needs? In Independent Thinking on Emotional Literacy, Richard Evans reminds every school educator that behind every child is a set of circumstances so entwined - and within them a set of emotions so involved - that to ignore them is to be complicit in any educational failings experienced by that child. Richard equips educators with a collaborative

'passport' template designed to improve pupils' emotional literacy and promote discussion of the often-unspoken issues that prevent children from making progress at school. It enables staff to steer young people to greater emotional understanding of themselves, so that they can better manage their route through the school system. Furthermore, Richard provides a detailed tutorial as he walks you through the subtleties and wide-ranging possibilities of its use. Colour copies of the passport are also made available for free download as a complimentary feature of the book. If the passport is aimed at anyone, adult or child, it's those not altogether happy with the system; those not convinced it provides as much breadth and meaning as it could; and who sense that education is as much about the acquisition of self-knowledge as it is about that of knowledge per se. Ultimately, the result of the enterprise is deeper understanding - whether it's of the girl who falls asleep at the back, the boy who needs constant support, or those

The Researcher's Toolkit-

David Wilkinson 2002-01-04
The Researcher's Toolkit is a practical rather than an academic text for all those undertaking, perhaps for the first time, small-scale research. Written by an experienced team of practising researchers, it covers the entire research process - from designing and

submitting a research proposal through to its completion. This book is suitable for all researchers, but is particularly designed for those practitioner-based researchers from the fields of education, social work, nursing, criminal justice and community work. This fresh new idea for those conducting small-scale research comes from a team of practising researchers who possess a broad range of experiences and knowledge of research design, execution and completion. They write in a user-friendly style that those researchers new to the subject will find easy to follow and understand. It will act both as a roadmap to planning, execution and completing research and also as a dip-in reference guide. Using features such as activity boxes to highlight key concepts and short summary boxes to indicate fundamental elements of the research area under discussion, this accessible book will be of great value to all who read it.

Catholic Education-Andrew B. Morris 2012-01-17 This collection of essays is concerned with the Catholic Church's understanding of the nature of human flourishing and the processes of education that flow from it. Each essay seeks, in its own way, to explore, illustrate and provide insights into the application of Catholic education policy and practice in differing socio/legislative circumstances. The book is divided into three main sections. The first explores Catholic teaching on education, its ethical basis and the Christo-centred nature of Catholic school leadership. The second considers some of the structural characteristics of Catholic educational systems in England, the United States of America and Jordan. The third section illustrates, in a series of case studies, how the

universal precepts underpinning Catholic education are implemented in a variety of national and international contexts.

Encyclopedia of Education Law-Charles J. Russo 2008-06-27 CHOICE Outstanding Academic Title for 2009 "A welcome addition to any public or academic library, this set would also be of use in a law library where educational law might need to be explored and reviewed at a more basic level than other

legal texts." —Sara Rofofsky Marcus, Queensborough Community Coll., Bayside, NY "Smaller educational legal summaries exist, and a couple of texts deal with Supreme Court cases about education, but this set provides a unique combination of general educational legal issues and case-specific information. It should be a welcome addition to academic and large public libraries. Also available as an ebook." — Booklist

The Encyclopedia of Education Law is a compendium of information drawn from the various dimensions of education law that tells its story from a variety of perspectives. The entries cover a number of essential topics, including the following: Key cases in education law, including both case summaries and topical overviews Constitutional issues Key concepts, theories, and legal principles Key statutes Treaties (e.g., the Universal Declaration on Human Rights) Curricular issues Educational equity Governance Rights of students and teachers Technology Biographies Organizations In addition to

these broad categories, anchor essays by leading experts in education law provide more detailed examination of selected topics. The Encyclopedia also includes selections from key legal documents such as the Constitution and federal statutes that serve as the primary sources for research on education law. At the same time, since education law is a component in a much larger legal system, the Encyclopedia includes entries on the historical development of the law that impact on its subject matter. Such a broadened perspective places education law in its proper context in the U.S. legal system.
