Switch-Chip Heath 2010-01-16 Why it is so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller Made to Stick. Psychologists have discovered that our minds are ruled by two different systems—the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants to eat all the delicious cookies. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change every time.
